Meeting title: Internship Day 15

Date + Time:	May 14,2024, 11:30 am
Location:	Jain University, Room-102

Attendees: Mr. Akash Das Futureense Technologies, CSE- AIDE: Sem IV Students	Agenda <ul style="list-style-type: none">• Understanding Subquery Types and Syntax:Learn about the different types of subqueries, including single-row and multiple-row subqueries.• Practical Usage and Application of Subqueries: Explore practical scenarios where subqueries are useful, such as filtering data, computing derived columns, and performing complex joins.
Solution https://github.com/arj1-1n/internship-phase-2/tree/main/16.05.24	
Training objectives <ul style="list-style-type: none">• Mastering Subquery Concepts: Understand the purpose and types of subqueries in SQL, including single-row, multiple-row, correlated, and non-correlated subqueries.• Applying Subqueries Effectively: Explore practical applications of subqueries in SQL, such as using subqueries for filtering, data retrieval, and computed columns.	Key takeaways <ul style="list-style-type: none">• Performance Optimization with Subqueries: Understanding the performance implications of subqueries and best practices for optimization.• Real-World Use Cases and Problem-Solving: Application of subquery concepts to solve business problems and data analysis challenges
