Minutes

Meeting title: Internship Day 10

Attendees:

Mr. Akash Das

Futurense Technologies,

CSE- AIDE: Sem IV Students

Solution

https://github.com/arj1-1n/internship-phase-2/tree/main/07.05.24

Agenda

Explore GROUP BY, aggregate functions, string functions, cardinality functions, HAVING clause, and math functions for comprehensive SQL proficiency.

Training objectives

Understanding SQL Functions
- **Define and categorize different types of SQL functions, including aggregate, string, cardinality, and math functions.**
- **Explain the purpose and usage of each function type in SQL queries.**

Key takeaways

1. **Functional Understanding of SQL Functions:** Gain a clear understanding of various types of SQL functions and their roles in data manipulation, enabling efficient query development.

2. **Enhanced SQL Query Proficiency:** Improve overall proficiency in SQL query writing by leveraging a comprehensive toolkit of SQL functions for data retrieval, transformation, and analysis, enhancing productivity and effectiveness in database tasks.
